

MeeFog™ Mobile-Mee 20 Gallon

What it does:

Rapidly covers large areas with any water-based chemical solution. The unique multi-nozzle sprayer reaches a distance of over 20 feet allowing the operator to deposit a thin film of solution in seconds.

The 10-micron droplets produce a thick cloud that forms a thin and uniform layer of chemical on sprayed surfaces, ensuring maximum coverage and reducing the use of expensive chemicals and pesticides.

Features:

- Industrial quality.
- Long service life.
- Plugs into any 120 volt wall outlet.
- 20 foot spray distance.
- Cart mounted pump and tank.
- 2,000 psi pump.
- Small droplets never overwet.
- Permeates deep into leaf canopies.
